MILL

The following is a summary of property we wish to sell.

MILL.

The size of the main floor of the mill is about 30 x 40 feet. Arranged conveniently with bins and spouts so that meal, cracked corn and oats can be spouted in bags. A run of stone to grind the meal, which runs directly in the bin from the elevator. We had an iron mill substituted for two other run of stone, the change coeting us \$700, which greatly adds to the speed of grinding, also to the quantity. We have just completed a new flume. Corn is drawn from the track in a wagon holding 500) pounds and sponted directly to a bin in the cellar holding four loads. From this bin it is carried by an elevator to a bin holding 400 bushels or to a bin in the flour house holding 500 bashels. Oats are carried to another part of the mill to a bin holding about 1500 bushels. Good water power, electric lighted, and telephone connections.

FLOUR HOUSE.

FLOUR HOUSE. Size is about 17 x 21 feet, at the right side of the mill. Divided so that a part can be used as storage of corn equipped with spouts to and from the bin. When not in use for corn this space is very convenient for flour and feed. .t is electric lighted.

STORE HOUSE Sige is about 30x40 feet. Connected with the mill. Used as a stock room for the storage of bagged feed. The door from this room leads through the office. Electric lighted.

SECOND STORE HOUSE. Located beside the track on leased land from the railroad. Holds about ten cars.

Phosphate House—The use of this house s given us free for the handling of the Bradley Barn-Size about 40x21 feet. Has six stalls,

second story for hay, and is electric lighted. Carriage Shed -The size is about 40 x 31 feet. Has a small loft for hay. Manure Shed-There is a manure shed at he left of the barn, where we now have four less. The size is eleven and a half by twenty-

HOUSE. A ten-room house beside the mill. Hectric lighted. A good garden. BUSINESS.

BUSINESS.

We have a good coal business that goes with the mill. We have handled Bradley's Fertilizer hore for several years and the Bradley Fertilizer furnishes all the money for this business. The flour and feet business can be conducted here with less capital than in other mills. We do not intend to carry any accounts ever thirty days and we also have a very large cash trade. Marshfield is located near Montpelier and the mill is connected with E. W. Bailey & Co. by telephone, Feed can be bought of them cheaper than at any other place in the United States. Our clear net gain this year, aside from small expenses, was \$1636.53. We have a very large custom grinding trade and we calculate that this branch alone will keep a man and pay for all the necessary repairs, so that any hing else made is clear profit.
